

CHEATSHEET FOR

---

*Git extras***Git-flow**

---

```
$ git feature myfeature  
switched to branch 'feature/rofl'  
  
$ ...  
$ git checkout develop  
$ git feature finish myfeature  
merging 'feature/rofl' into develop  
deleted branch 'feature/rofl'
```

---

Also git-bug and git-refactor.

**Branches**

---

```
$ git delete-merged-branches  
# hint: do `git remote prune origin` after  
  
$ git create-branch development  
$ git delete-branch development  
  
$ git fresh-branch gh-pages
```

---

## Inspecting

---

```
$ git summary    # repo age, commits, active days, etc
$ git impact     # impact graph
$ git effort     # commits per file
```

---

## Github

---

```
$ git fork strongloop/express
```

---

## Tags

---

```
$ git release v1.0.0          # commit, tag, push-tags
$ git delete-tag v1.0.0
```

---

## Conveniences

---

```
$ git ignore "*.log"
```

---

## Locking

Assumes that changes will not be committed.

---

```
$ git lock config/database.yml
$ git unlock config/database.yml
```

---

## Etc

---

```
$ git obliterate secret.yml # remove all references to it
```

---
